ISO 31000 is a recognized quality management standard for use in quality management within the manufacturing process. In 1992, the Aviation Safety Authorities from both ICAO and IATA (the two regional aviation trade organizations in the Americas and Europe, respectively) began working together on the development of a standard for aviation accident and incident reporting. The result was published in December 1994 and was based on an earlier set of guidelines under the auspices of ICAO, though the process was completely independent of ICAO and IATA.
