In fact, Elden Ring is a fantasy action RPG that incorporates the elements of MMORPG, old school RPG and action RPG. Players can enjoy action and make friends while enjoying the sense of freedom of exploration as well as the communication and fantasy adventure of an online game. Despite the simple interface and detailed graphics, Elden Ring is a deep game packed with content. Players can customize and equip weapons and armor, using a wide variety of abilities that affect them, and become an Elden Lord and conquer the Lands Between. Key Features:

- An Entire Adventure in the Lands Between 'Between 1.0' allows players to enjoy their freedom of exploration in the Lands Between. The 'Adventurer' difficulty is suitable for beginners and the 'Champion' difficulty is suitable for hardcore players.
- Simple but Detailed Combat System Players use their equipped weapons and armor to attack enemies. The game consists of a variety of attacks, and combat requires tactics and timing.
- Player vs Player Battles There are a variety of Player vs Player (PvP) battles, and friendly battles are also available.
- The Immersive Story and Missions Players complete story missions and clear dungeons to gain in-game items, and in turn, help characters who have told their own stories and are now traveling together.
- Rich User Experience Elden Ring is intended for players who want to enjoy an adventure and experience online fantasy.

## **Features Key:**

Eclipse, a Legendary Ring the Earl of Light, which grants victory to the bearer. Players seek to become the bearer of this powerful crystal that enshrines the hidden truth of the world. Can you rise to power as an Elden Lord and return the world to glory?

An Epic Fantasy World A vast world in which seamless network play and a highly diverse map are linked together. A verdant world where a forest of dreams grows, full of trees and monsters. A bottomless river whose shores churn with the power of magma.

Action RPG Based on Fantasy An action-RPG game with rich graphics and one that fully keeps the action-RPG aspects. As you fight through a variety of enemies, you will be struck by riddles or succumb to the power of a great enemy.

Role-Playing Game with Real Emotions A role-playing game where every one makes their own fate and can freely change even in the midst of battle. Feel the anger of Tarnished Walker when he is unable to save the people and friends left behind. Feel the joy of seeing the world when you defeat a monster and save the people.

Independent Title A game developed on a budget of just 100 million yen. Based on the concept of the action RPG Fate series, with various genres applied, the main gameplay is linked to that of the action RPG genre. The game is working hard to be a completely new title with no relationship to any existing titles.

Wide Variety of Characters that Make You Feel Alive A huge cast of playable characters, from heroes to villains. In addition, the development team's aim was to avoid having a single concept for character development. Character development revolves around the emotions of each player. If your character is giving you a hard time, you can switch him out with a different character.

The Adventure Continues Online By syncing with each other, you can interact with others in an online setting. Can you build friendships through the journey? Or is your character's quest for the Eclipse a source of tension?

Map Sharing Based on the concept of map sharing, you can use your saved maps online.

Thousands of Active Players Online The maximum online setting, ranging from single player to online group play, will let you touch the world

Gameplay ELDEN RING Companion App: For detailed information on the Elden Ring game, check out: COS-OP COS-OP (Combat Oppression System Online) is the companion app for Elden Ring. This app provides various functions that can be used by many users at once. Various elements can be combined to create your own COS. If you're not already an iOS user, or if you're an iOS user who has trouble using applications, then we recommend using this application to get started. NOTE: As this app is being added for free. It is possible that some functions may not work in certain circumstances. Play with COS (Combat Oppression System) In the COS app, select the function you wish to use and drag and drop. You can set a 6 second delay before the application is actually put into action, and set the number of times to be able to use the function each time. You can select a function name, set the style of the box, change the shape of the box and much more. There are many elements that can be set to fit your play style and situation. COS (Combat Oppression System) Use COS (Combat Oppression System) by itself to summon the material required to use the function. The COS that you want to use is provided to you in a combo box. Toggle the function for as many times as you want to use it. If it's the same COS, it will be taken one step at a time. If it's different COS, you'll be able to bring the COS with a higher level at once. There are tons of functions in the COS app so give it a try. (If you have any questions or concerns, please send us a message on the COS app.) CONTENT: As the iPhone is a phone, you can enjoy things while talking to friends and family, but you can also play various games. If you choose to use the game function of the iPad, you can play this game on your own schedule. The game will be synchronized with the Elden Ring game and you'll be able to use the functions that are available in the COS app in the game, as well. In addition, this is available for free. A simple and

### **What's new in Elden Ring:**

**But hey that's normal when it comes to fantasy games...  
Fantasy games usually get a new version every 2-3 years or so  
Like its predecessors, this game has upgraded graphics (there's really little that a game can do to impress you visually**

---

anymore), made a few changes to the gameplay (mainly changes to things that older players found annoying in the previous version), released the full enemy and party guide (the only possible complaints at this point in the release cycle), and compressed the save files to save band width usage when playing. None of this really matches the the newest games in the genre (Skyrim, Witcher 3, Grand Theft Auto V, etc) and rather than be impressed, it's easier to be slightly disappointed. As was the case with the previous Elden Ring games, the new version has better music, effects, and sound. Now, the problem here is that these sound updates don't really match up with the artwork of the game. While I would prefer to have a game have better music and effects compared to the artwork, that's not actually the case in Elden Ring 3. The 2 new pieces of music and one new sound effect are now coming second to the younger-generation artwork. The magic system has definitely been improved as well by being streamlined. As for the combat, I imagine that most people already knew the combat was going to be greatly improved anyway. The biggest change it faced was with the real world nobility system, which was essentially redesigned for this new entry in the genre. The nobility system was originally introduced in the latest Elden Ring game, where you'd use it to raise the cost of your equipment. In Elden Ring 3, items that are sold in a shop are now priced based on your honor (which is also used as currency to buy new equipment). Honor ranks are now display in the personal inventory and are meant to make each player feel like a real leader of the masses. That's fine and all, except for that getting honor doesn't actually play a significant part in the game's new combat system (which revolves mostly around fighting monsters). Other than that, there's not much else to say here. The game is pretty much exactly what one would expect from a 3rd Elden Ring game (with a few new features). If you enjoy fantasy RPGs like myself, there really aren't many games out there with this particular genre. If you're even looking for such a game, then you might want to look into World of Warcraft (which is still loved by most)

**Q: Update a checkbox inside a li I have the following html :  
apple orange I need to make it so that the checkbox inside a LI  
will be checked when the LI itself is checked. I've tried using  
:checked but it doesn't seem to work. I found these questions  
but these don't seem to help my problem: 1) jquery if  
(\$("#active-element").prop("checked", true)? "checked" : "") 2)  
jquery: Checkboxes inside of li checkboxes do not work A: You  
can use the :checked selector in combination with  
jQuery's.closest() method to get the closest li-element and then  
get its checkbox element with.find(). In this example I'm  
basically checking if the current li is checked and if so, checking  
the checkbox of the same li. Otherwise, I'm simply unchecking  
it. // this will work for every checkbox  
\$('input[type="checkbox"]').change(function () { // we get the  
current li's checkbox var \$liCheckbox =  
\$(this).closest('li').find('input[type="checkbox"]'); // if the  
current li is checked, check the same, else uncheck it if  
\$('li:checked', \$liCheckbox).length == 1)  
\$liCheckbox.prop('checked', true); else  
\$liCheckbox.prop('checked', false); }); // this will only work for  
the current li \$('input[type="checkbox"]').change(function () {  
var \$liCheckbox =  
\$(this).closest('li').find('input[type="checkbox"]'); if  
(\$('li:checked', \$liCheckbox).length == 1)  
\$liCheckbox.prop('checked', true); else  
\$liCheckbox.prop('checked',**
