Allows you to connect multiple audio devices to the same audio jack. Allows you to send messages to multiple contacts simultaneously. Note: The app comes with ads but its not necessary to have a internet connection in order to use this app. If you have a phone, tablet or other devices that supports browser, you can also install the Zapya browser extension and use ZamTalk without the app. ZamTalk Messenger will stay on your favorite contacts and some of the least favourite contacts (this is called whitelisting). You can blacklist contacts (in this case they won't appear in your list) or re-add contacts who have been whitelisted. You may also modify them in order to use some of their feature, which are disabled by default. ZamTalk Messenger is now available to download for free. You can use this app for free with an in-app purchase option for removing ads (This option is not available for the Lite version). Pro Features Blacklist Contacts You can blacklist contacts so that they won't appear in your contact list, by accessing the settings. Disable Roster You can disable the contacts that you have whitelisted so that they don't appear in your contact list. This can be useful if you have very many contacts or when you are browsing contacts. Remove Whitelisted Contacts You may have some contacts from whom you want to remove the whitelisting. You can do this from the settings. Download History You can view a history of the files you have shared or received. Screenshots ZamTalk Messenger
