History AutoCAD was first released in 1989 for PC DOS by Autodesk, and was later ported to Windows and Macintosh. Starting with AutoCAD 2000, it was built in C++, rather than the assembly language of earlier versions. Since its release in 1998, AutoCAD has become the leader in vector-based 2D CAD and BIM. With over 33 million copies sold, it has become the world's best-selling CAD software. In 1996, AutoCAD LT was released, at the time the only vector-based CAD program on the market. It is still in production, supporting all AutoCAD and AutoCAD LT functionalities, as well as SketchUp, with enhanced DWG export support. A smaller and cheaper version of AutoCAD, AutoCAD LT is used primarily by architects and engineers. It is currently available for Windows, Mac OS, and Linux. With the introduction of AutoCAD 2010, a 3D product called AutoCAD Architecture was also introduced. AutoCAD 2010 was built on .NET, using Visual Studio 2005. It was the first major upgrade since AutoCAD R14, which was developed using Visual LISP. AutoCAD 2011 was also available as a .NET application. With the release of AutoCAD 2011, the newest updates to AutoCAD 2007 are made available to the user. In 2012, Autodesk released AutoCAD 2013, the first major release since AutoCAD 2010. Along with other improvements, it was built on C++ and integrated many features from AutoCAD 2011. In 2013 AutoCAD 2013 was released for Windows, Mac and Linux. In 2016, Autodesk released AutoCAD LT 2016. It is still available in 2018. AutoCAD was also released on the iPad in 2012. AutoCAD Architect was released in 2013, which supports both the iPad and iPhone. AutoCAD Architecture was also released for Android in 2017. Touring In 2002, Autodesk launched the first virtual tour of the entire AutoCAD product line. This is a web site that is a self-guided tour of the product's features. It was launched as a proof-of-concept and featured what was then AutoCAD's 17th release, AutoCAD 2000, along with a series of demos illustrating AutoCAD's capabilities. This original web site was redeveloped in 2013 as an online AutoCAD store and af5dca3d97
