page. \*Extract the Zip folder (inside of the downloaded file). \*Copy the  
x86 folder to your app folder. \*Reboot the system, launch the app. It  
does what it should.In some cases the download can be corrupted.In that  
case download it again.When you open the file for the second time it's  
automatically installed.If after that you have no additional software that  
require the installation you can simply unzip and run the app.Download  
WinMend Auto Shutdown, Free Download WinMend Auto Shutdown.  
Thank You. Auto Shutdown was an easy and trustworthy tool to turn the  
computer off at a chosen time. Now in version 4, it has a regular user  
interface, more flexible schedule options, and more advanced  
automation settings. When you use Auto Shutdown, Windows will

---

immediately go to sleep at the scheduled time, without requiring you to log off or shutdown the machine. Once your system is up again, Auto Shutdown will launch itself. You can use it to switch the system off, hibernate, sleep

## **WinMend Auto Shutdown**

Turn off the computer when you leave. Nothing personal, just turn off the computer when you leave. No user interface, no need to edit any settings, no user intervention. This is WinMend Auto Shutdown Product Key. WinMend Auto Shutdown should not be considered a power-off application, as it needs a minimum system specification to run (Windows 7 or XP). That said, you are likely to encounter an annoying blinking message. Automatic Shutdown If you look for the Auto Shutdown feature in Windows 10, look nowhere else. Through the Windows 10 settings, you can easily configure all the action to take when you leave the computer: Power off the computer when not in use, power on when you log in again, Sleep mode and Hibernate. How do I turn off my computer? Use the settings to configure which actions to take when you leave the computer. You can set up: Power off when you leave. When you wake up, log in again. Turn on when you leave. Turn on when you wake up. Suspend when you leave. Hibernate when you leave. Ideal for people who leave their computers and don't want to have to do all the work to manually shut down a system. You can also use the timeout option to turn off your computer after a given period of time has passed. 1. Open the Start menu, tap on Settings and choose Control Panel. 2. Click on Power Options, choose the Turn off my computer when I leave this PC. Automatic Shutdown Pro Power off if idle: When the system is idle it will shut down when the computer is left untouched for 5 minutes. During the 5 minutes the screen will dim and any running programs will be shut down. This is useful for applications such as: Visio, Excel, Photoshop, Microsoft Office, QuickBooks and Adobe. Power off when unattended: Automatically shut down the computer when the user has left the computer unattended for a set period of time. For example, if you leave the computer unattended for an hour, the computer will shut down. Hibernate when idle: When the system is idle it will shut down the computer. It will have the computer shut down with the power, and the hard drive and data will be restored to the state it was in when you turned on. This is useful for applications aa67ecbc25
