System Requirements: - Windows 98/ME/NT/2000/XP. - Pentium III or above. - 128 MB or more RAM - 256 MB or more HDD - Sound card Connectivity: - Tuner card - VGA monitor - Hardware MPEG decoder DVSPortal TV Viewer Application Review January 01, 2008 By William E. Rated 5 out of 5 Best D*Viewer App Available -5th Feb 2008 I think this is the best D*Viewer app on the market. It's a continuous problem to find a good one. The "TV Viewer" works quite well on Windows XP and later, but is buggy in Windows 2000. The DVSPortal has the same problem in Windows 2000, and also runs in Windows XP with little user feedback. What I like: - Works on all Windows (95, 98, ME, NT, 2000, XP). - Works on all video cards, including onboard (ATI, Compaq, etc.) - DVB tuning capability - Some customizations What I dislike: - No remote control - Crashes regularly and hiccups - No DVD recording capability I've also tested the free version of the built-in D*Viewer application on Windows XP and it works

System Requirements:

* Windows * Intel® Pentium® 4 processor 2.4 GHz or faster * Intel® Core™ Duo processor 1.6 GHz or faster * 2 GB of RAM (Windows XP/ Vista: 3 GB) * 500 MB of available space (Windows XP/Vista: 1000 MB) * OS X * Intel® Core™ 2 Duo processor 2.4 GHz or faster * Intel® Core™ i5 processor 1.6 GHz or faster * 2 GB of RAM (OS X 10.6
